

Dear CERN Selection Committee,

I am writing to express my keen interest in the CERN Summer Student Programme. As a passionate learner with a Certificate in Information Technology (CIT), I am eager to contribute to CERN's mission of advancing science and innovation while gaining international exposure in a world-class research environment.

During my CIT diploma, I developed hands-on experience in HTML, CSS, and basic graphic design using Coral Draw and Adobe Photoshop. I have created small projects including a personal portfolio and sample landing pages, which reflect my growing interest in frontend development and user-centered design. I am currently expanding my skills through self-guided learning and online courses, with a strong desire to apply my knowledge in real-world settings.

I am particularly drawn to CERN's collaborative and interdisciplinary culture. The opportunity to work alongside global experts and contribute to meaningful digital tools or web platforms would be a transformative experience for me. Although my final diploma result is pending, I am confident in my academic foundation and my commitment to continuous learning.

Thank you for considering my application. I would be honored to be part of CERN's vibrant community and contribute to its groundbreaking work.

Sincerely,

Ano
